

## **Three Rivers Systems offers free, year-round webinars for CAMS Enterprise customer updates, training**

*Sessions archived for users on CAMS Community site*

**ST. LOUIS, Mo. — December 20, 2009** — Three Rivers Systems Inc. has launched a series of free training webinars for its flagship CAMS™ Enterprise product to help deliver on its promise of leading the industry with the best technology, most-comprehensive training and exceptional service.

CAMS — short for Comprehensive Academic Management System — Enterprise is the only academic ERP product that is 100-percent Web-based, truly integrated and designed purely for use with Microsoft products.

Because of these attributes, CAMS users routinely report greater operating efficiency and annual IT budget savings ranging from 50 to 75 percent, the best return on investment in the industry.

The free webinars are being offered throughout the year to help CAMS managers and users stay up to date with the latest features and make the best possible use of the comprehensive system. As a part of the annual maintenance program, CAMS Enterprise clients regularly receive enhancements that bring new capabilities, improve functions and help increase the efficiency and effectiveness of user institutions.

These webinars provide overviews of new functionality, in-depth “how to” instruction, refresher training and opportunities for users and managers to learn new ways to use CAMS Enterprise as effectively as possible.

Upcoming sessions, while subject to change, will focus on “Reporting for Admissions and Recruiting,” “Degree Audits: Setup and Reporting,” “Using the Course Management System” and “Build Your Own Reports — BYOR— for Advancement.”

Previous topics have included “Custom ISIR Fields and ISIR Document Tracking,” “What’s New in CAMS 12.0” and “1098-T Reporting and Troubleshooting Tips.”

All webinars are archived in the CAMS Community and can be accessed by Three Rivers Systems customers as video or PDF files at <http://cehelpdesk.threerivers-cams.com/camsconnect/Webinars/tabid/164/Default.aspx>

**About CAMS Enterprise**

Developed from the ground up with Microsoft Internet technologies, CAMS Enterprise, is a highly scalable, comprehensive academic management system that is quick to implement and easy to use. CAMS Enterprise consolidates multiple stand-alone systems including admissions, student information, financial aid, student services, student billing, fund-raising, alumni relations, document management, course management system, a full suite of portals, and more into one solution that ensures administrators, staff, faculty and students all work with the most recent and most accurate information. By uniting administrative and academic management systems, CAMS Enterprise is the only totally Web-based, completely integrated solution for managing the entire student lifecycle.

**About Three Rivers Systems Inc.**

Three Rivers Systems Inc., the developer and service provider for CAMS, is headquartered in St. Louis and has been delivering innovative technology-driven solutions to the educational community for the past 25 years. The company has a large established client base throughout the U.S., and a rapidly growing international presence with clients in North America, South America, Europe, the Middle East, Africa and Asia.
