Redefining the Academic ERP Experience

Three Rivers Systems Inc. expands to new larger headquarters

Company's consistent, planned growth requires move to new offices in St. Louis

December 29, 2009 — St. Louis — [Three Rivers Systems Inc.](#), the only provider of 100-percent Web-based campus administrative software systems built from the ground up exclusively for higher education, has purchased and occupied new, larger headquarters. The new facility features an advanced technology infrastructure and some 21,000 square feet allowing the firm to upgrade operations and accommodate consistent, planned growth — a company hallmark.

“Our continued growth made this the right time to invest in new facilities for our expanding workforce,” Three Rivers Systems Founder and President Amir Tajkarimi said. “These new offices allow us to grow, collaborate more effectively and continue to provide the excellent level of customer service our clients expect and deserve.”

According to Tajkarimi, the new expanded telecommunications center allows the company to respond to technology advances while offering enhanced customer support, more remote training, additional webinar broadcasts and other interactive exchanges like teleconferencing. With powerful electrical generator back-up, the company's new, larger virtualized data center also ensures seamless business continuity during emergencies.

Purchased outright from cash reserves, the building and move will have minimal impact on the company's balance sheet. “In nearly 25 years of doing business as Three Rivers Systems, we have never borrowed a penny,” Tajkarimi said.

He believes his company's sound business practices and fiscal independence benefit clients. “We put our resources into technical innovations and customer service, not into interest payments. And, more importantly we're beholden only to our customers — not to investors, shareholders or an anonymous corporation,” he said

The company's continuing success is based in large part on its flagship product [CAMS Enterprise™](#), a safe, secure, totally integrated product eliminating the need for university faculty, students and administrators to learn, interface and manage multiple, patchwork and often incompatible systems.

A seamless academic ERP written from the ground up as a single solution, CAMS Enterprise uses one database and standardized Microsoft® technology rather than separate systems written with dueling technologies from different vendors. Academic institutions around the world using CAMS' proven implementation process and integrated solutions enjoy greater accessibility, better automation, improved communication, deeper business intelligence and verifiably higher ROI. Many customers report annual IT savings as high as 75 percent.

About CAMS Enterprise™

[CAMS Enterprise™](#) is a Web-based, server-centric comprehensive academic management solution for higher education. As the fastest system to implement, easiest to use and most cost-effective, it requires little or no client maintenance. Developed from the ground up with Microsoft Internet technologies, CAMS Enterprise is the only ERP solution that truly integrates its multiple stand-alone systems around a single database. This unique architecture allows CAMS Enterprise to support admissions, registration, financial aid, student services, fiscal management, fund-raising, alumni relations, course management and much more. All are completely integrated via a full suite of portals in one solution that ensures administrators, staff, faculty and students all work with real-time, accurate information. By uniting administrative and academic management, CAMS Enterprise is the only truly integrated system for managing the entire student life-cycle.

About Three Rivers Systems Inc.

[Three Rivers Systems Inc.](#), the developer and service provider for CAMS, is headquartered in St. Louis and has been delivering innovative technology-driven solutions to the educational community for 25 years. The company has a large established client base throughout the U.S., and a rapidly growing international presence with clients in North America, South America, Europe, the Middle East, Africa and Asia.
